

ABSTRACT

A power assembly system is disclosed that includes a) a collar unit; and b) an internal power unit, wherein the internal power unit is coupled to the collar unit. A power assembly couple is also disclosed that includes a) the power assembly system described herein; and b) a meter base assembly, wherein the meter base assembly is coupled to the power assembly system to form the power assembly couple. Methods of forming a power assembly system are provided herein that include: a) providing a collar unit; b) providing an internal power unit; and c) coupling the collar until to the internal power unit. Also, methods of forming a power assembly couple are disclosed herein that include: a) providing the power assembly system described herein; b) providing a meter base assembly; and c) coupling the power assembly system with the meter base assembly to form the power assembly couple.
